RE: Approval to turn on your Solar System Account No. 0524095331 (Reference# 130932370)

Dear EDWARD VIRAMONTES:

Congratulations on investing in a renewable energy system. We want to continue to partner with you to control your energy costs and provide you the resources needed to help protect the environment.

Your new solar system located at **10 MEEKS LN, OAKLEY, CA** has permission to operate as of 03/17/2025. It may take up to two billing cycles before your bill is updated to include your solar credits; however, your PG&E meter is now recording the credits for your system. No credits that you have earned will be lost, regardless of the month in which your bill is updated. **Please turn on your system to start receiving solar credits.** In most cases, your installer will help you turn on your system.

You are enrolled in the following program, NBT.

Customers with existing systems will continue to be billed on their current NEM tariff if their system size increase was within the permitted limits or only included an energy storage addition.

Tools and Resources:

- Get valuable information how the Net Energy Metering billing works and what to expect in our [Welcome Kit](#)
- Get instant access to all your PG&E bills and other tools to help keep your electricity bill low by logging onto pge.com/myenergy

The equipment covered by this letter includes:

Total Effective Inverter Nameplate Rating: 3.747 kW

Inverter - External: 1x SolarEdge Technologies Ltd. - SE3800H-US [240V] [SI1-SB]

PV Panels: 13x Qcells North America - Q.PEAK DUO BLK ML-G10+ 410

Battery: 1x SolarEdge Technologies Ltd. - BAT-10K1P

If you have additional questions, please contact our Solar Customer Service Center at 1-877-743-4112. We're available Monday through Friday from 7 a.m. to 6 p.m.

Sincerely,
PG&E Electric Grid Interconnection

As a requirement of PG&E's Electric Rule 21 and your Interconnection Agreement, this letter authorizes and applies only to the system described above. This agreement does not confirm the safety, durability or reliability of your generating system. PG&E's authorization for you to operate your generating system is Interconnection Agreement and any other applicable rules, tariffs, laws and regulations.

You can read about PG&E's data privacy practices at [PGE.com/privacy](https://www.pge.com/privacy).
